WHAT WE LOVE MOST ABOUT SLACK AND ZOOM AND A NEW TOOL FOR THE 2021 TECH STACK

ZOOM FOR VIDEO

It's replaced team meetings.

Zoom has become an essential tool for the remote office tech stack, but it's being overused. It's the best synchronous comms tool for dispersed teams, but has its limitations.

BEST TOOL FOR
HUMAN
CONNECTION

PLACE TO
BRAINSTORM AND
DISCUSS IDEAS

VOODLE FOR THE BEST OF BOTH

It's a new async, video-based, remote work tool.

Voodle is built with our favorite aspects of both these tools. It's async, so nothing is lost and you can respond on your own time. It's video-based to maintain team-intimacy and real connection.

SLACK FOR ASYNC

It's replaced most emails.

Slack is used all day by most remote teams to send quick messages. It organizes and stores all written comms, but human connection and nuance are lost in text form.

ASYNC TOOL
THAT ARCHIVES
EVERYTHING

ALLOWS YOU TO
WORK WHEN
YOU WANT

THE FUTURE OF WORK IS HERE. [VOODLE.COM](https://voodle.com)
